Jim Leland, Principal Planner
Solano County Dept. of Resources Management
675 Texas Street, Suite 500, Fairfield, CA 94533
JHLeland@SolanoCounty.com

TOPICS

The Woodcreek 66 Environmental Impact Report (EIR) will present analysis on the following topics:

- Aesthetics
- Air Quality
- Biological Resources
- Cultural Resources
- Landslide Risk
- Greenhouse Gas Emissions
- Hydrology and Water Quality
- Noise
- Public Services and Utilities, Including Recreation
- Transportation / Traffic

Have we missed any important topics? If so, which ones?

_____

_____

_____

Should any topics be broken out separately or combined?

_____

_____

_____

FOCUS

Due to the location, scale, and character of this project, should the EIR place particular focus on certain topics? If so, which ones?

_____

_____

_____

Should topics be dismissed from further consideration? If so, which ones?

_____

_____

MITIGATION MEASURES

Mitigation measures are changes to the design, phasing, or operation that would reduce or avoid environmental impacts. Please suggest mitigation measures that could address impacts of this project.

_____

_____

_____

_____

ALTERNATIVES

The County will consider alternatives to the project that could potentially reduce or avoid environmental impacts. This could include changes to the site plan, different mixes of land use, and other options. Do you have ideas for alternatives that would reduce or avoid environmental impacts?

_____

_____

_____

_____

CONDITIONS ON-SITE AND IN THE VICINITY

Are there existing conditions on the project site or in the vicinity of the site we should consider in the EIR analysis? If so, please describe them.

_____

_____

_____

_____

INTERESTED PARTIES

Do you know of public agencies, public and private groups, or individuals that the County should contact regarding this project and the accompanying EIR? If so, please list them.
