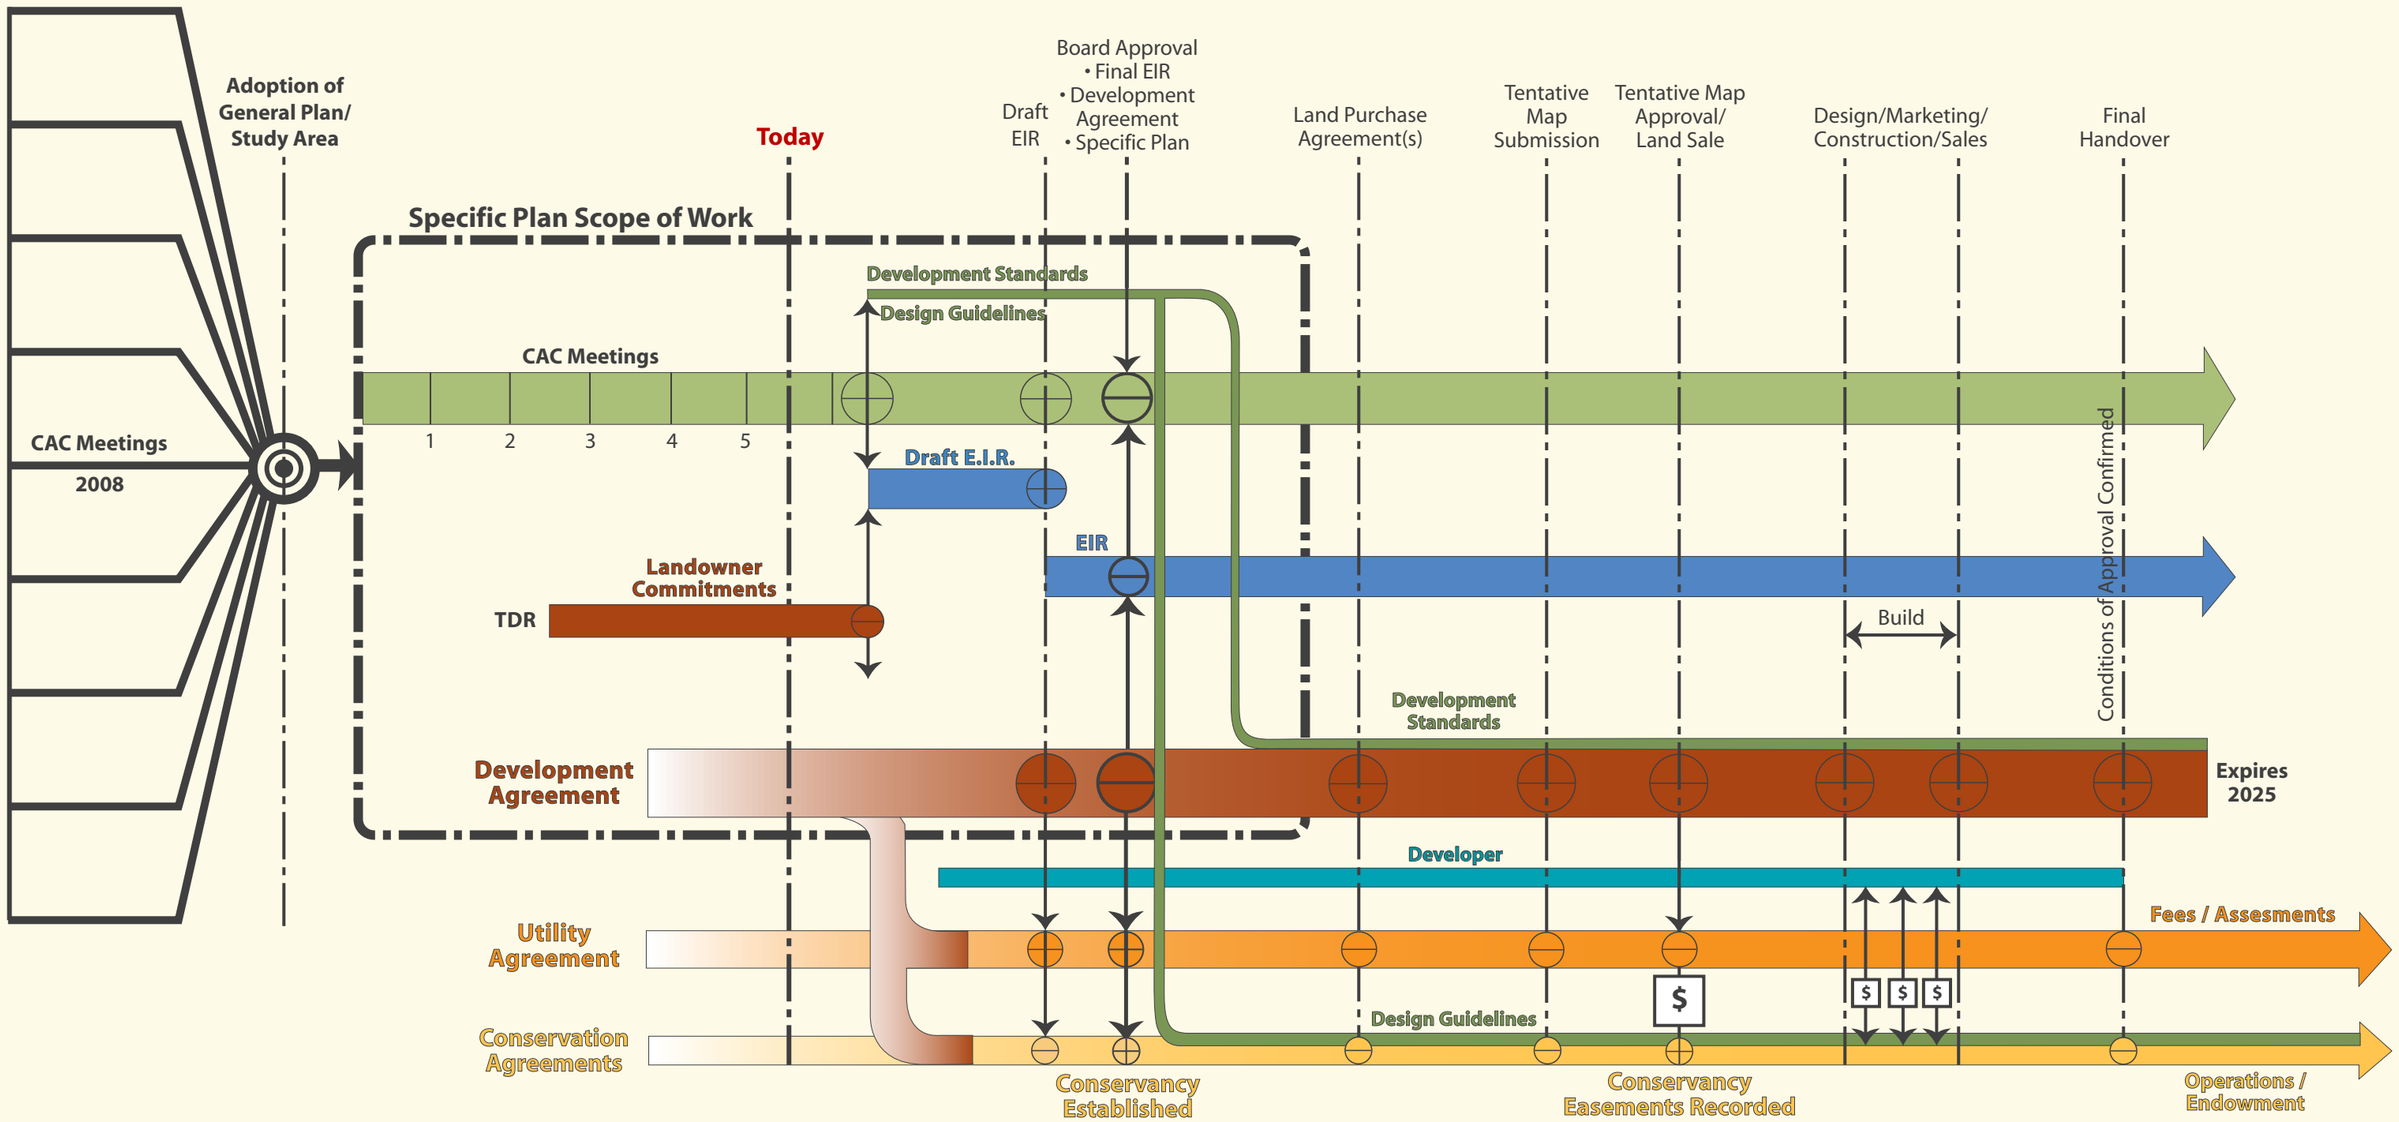
- ***Steve Abrams*** (steve@abramsassociates.com)

"The great conservation opportunities of the next century will be on privately owned land, and conservation easements are the most effective way to protect these lands. Landowners like conservation easements because they are a refreshing alternative to government regulation; they are voluntary, local, and respect private property rights. For the many people who love their land, it is the best way to ensure that it will be preserved for all time. "

- Rand Wentworth, Land Trust Alliance

Green Valley Implementation


HOW ALL THIS GETS DONE
